

Inventory Management System

Project Overview

Inventory Management System built using React.js, Node.js, Express.js, MySQL and Bootstrap. The system manages products, purchases, sales and stock tracking.

Features Implemented

- User Signup/Login/Logout
- Product CRUD
- Purchase Records
- Sales Records
- Stock Tracking
- Low Stock Alerts
- Dashboard Statistics
- Product Search
- Prevent Negative Stock

Technology Stack

Frontend: React.js, Bootstrap

Backend: Node.js, Express.js

Database: MySQL

API Testing: Browser/React Integration

Database Tables

users, products, purchases, sales

Business Rules

Stock increases on purchase entry.

Stock decreases on sales entry.

Sales are blocked when stock is insufficient, preventing negative stock.

Dashboard

Displays Total Products, Total Purchases, Total Sales, Total Stock and Low Stock count.
